website's background

Currently, Siantar Zoo faces challenges in delivering information to visitors manually. This method is time-consuming and often fails to provide complete information. Therefore, an efficient and accurate solution is needed to communicate information to visitors.

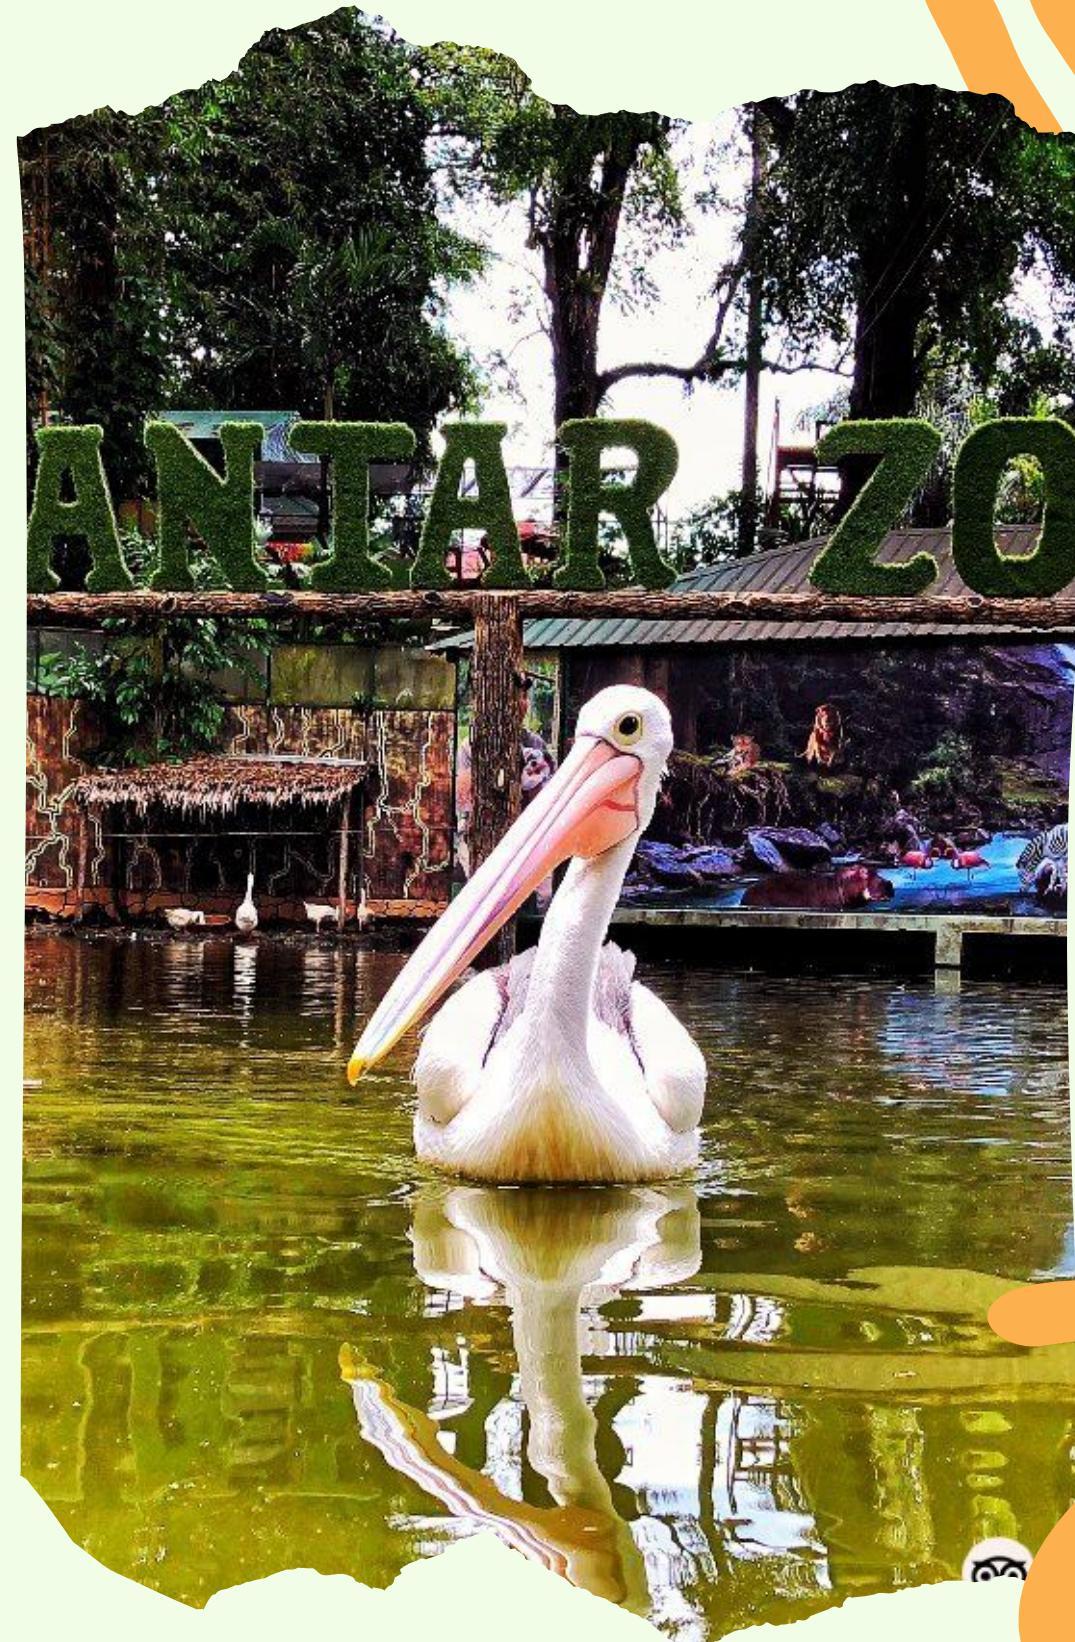

Goals

The goal of developing an official website for Siantar Zoo is to provide accurate, detailed, and easily accessible information to visitors. The website will contain information about the facilities and animals at Siantar Zoo, as well as schedules of shows and special events. With this website, visitors can obtain the necessary information before visiting Siantar Zoo, enhancing their experience and helping them plan their visit more effectively.

Methods Were Implemented to Achieve the Goal?

In the context of creating the official website for Siantar Zoo, the method used is the waterfall approach for project development.

The waterfall approach is a software development model that involves sequential and linear stages, starting from requirements analysis, design, implementation, testing, and maintenance.

The implementation of the methods

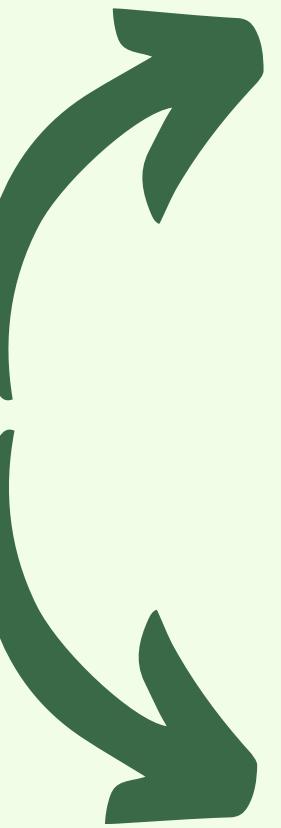

Collecting Information: Gathering accurate and detailed information about the facilities at Siantar Zoo.

Gathering Animal Data: Collecting data about the animals present at Siantar Zoo, including species names and descriptions.

Website Development: Creating a visually appealing and user-friendly website.

The implementation of the methods

Content Organization: Structuring and organizing the collected information and data within the website.

Testing and Improvements: Conducting testing to ensure all features function properly and the information presented is accurate.

The Analyst Result

The detailed analysis results indicate that Siantar Zoo faces several challenges in delivering information to visitors. Relying on a manual system results in long delivery times and often incomplete information. Therefore, the required solution is to build an official website for Siantar Zoo that provides accurate, detailed, and easily accessible information to visitors.

This website will serve as the primary source of information for visitors seeking to learn about the facilities available at Siantar Zoo. The provided information will include pictures and descriptions of each animal in the park, offering a clearer picture of the various species that can be found at Siantar Zoo.

The Analyst Result

In developing this website, the main focus is to ensure that the presented information is accurate, detailed, and easily accessible to visitors. The website design will be visually appealing and feature a user-friendly interface, enabling visitors to navigate the site easily and find the information they need.

Through the implementation of this website, visitors will be able to obtain accurate and detailed information before visiting Siantar Zoo. This will enhance their experience, assist them in planning their visit more effectively, and provide convenience in accessing information about the facilities and animals within the park.

conclusion

- TO FACILITATE VISITORS IN ACCESSING COMPLETE, ACCURATE, AND EASILY ACCESSIBLE INFORMATION AT SIANTAR ZOO.
- ASSIST SIANTAR ZOO EMPLOYEES IN CONVEYING INFORMATION REGARDING THE ZOO
